

INCOMPLETE / PENDING TASKS REPORT

Sports Club Management System

1. Public Landing Page (Homepage)

Build the root index.php with a modern, premium UI (Hero section, features list) linking to the registration and login portals.

2. Roles & Permissions (RBAC) Enforcement

Implement strict access control to differentiate between Super Admins and regular Admins in the settings module.

3. Live Payment Gateway Integration

Replace the offline/manual payment marking with a real gateway (e.g., Razorpay/Stripe) API integration for the athlete portal.

4. Real Email/SMS Integration

Configure SMTP (PHPMailer) and a real SMS API provider (like Twilio/Msg91) to send actual notifications instead of local mock functions.

5. Production Security Audit

Final polish before deployment: implement CSRF tokens on forms, ensure strict password hashing, and configure error logging.
